Profile

Computer Engineering student and Full Stack Developer with practical experience building scalable, user-focused web applications. Skilled in ASP.NET Core, Angular, React, and Node.js, with a strong foundation in OOP, databases, and clean architecture. Experienced in agile development and collaborative teamwork, consistently delivering efficient and maintainable solutions.

PERSONAL PROJECTS

GUC Internship Management System

02/2025 – 05/2025

Designed and developed a web-based UI prototype using React and JavaScript to streamline internship application, enrollment, and evaluation processes. Focused on UI/UX best practices, intuitive navigation, and responsive design, delivering a user centered interface based on product manager feedback and project requirements.

Telecom Management System

10/2024 – 12/2024

Telecom Management System project implementing a relational database and a web application interface. The database handles telecom operations like account management, payments, and service plans, while the web application provides functionalities for administrators and customers. Developed using SQL Server and ASP.NET

Attack On Titans Utopia

03/2024 – 05/2024

Utilized object-oriented programming (OOP) concepts in Java and MVC architectural pattern for implementation. Collaborated with team members to ensure the integration of the game engine with the graphical user interface (GUI).

Professional Experience

05/2025 – 08/2025

Remote

Software Engineer Intern

OpenQQuantify

- Contribute to the design and development of software solutions in **Python, JavaScript, and HTML/CSS** for applications in electronics, AI, and embedded systems.
- Developed a **Flask-based web application** with implemented SQLite database integration
- Collaborated with a distributed development team using agile practices, participating in code reviews, technical discussions, and project planning.
- Gained hands-on experience in API integration, web application architecture, and database management.

11/2025 – Present

Cairo, Egypt

Full Stack Developer

SGT Digital Solutions

- Contributed to product-based **SaaS projects** by developing and maintaining **cloud-first web applications** using **ASP.NET Core Clean Architecture** principles.
- Built responsive front-end interfaces with **Angular**, ensuring smooth integration with backend APIs.
- Collaborated with senior developers to design, implement, and test scalable features.

EDUCATION

Computer Science and Engineering

The German University in Cairo (GUC)

08/2022 – Present

SKILLS

Programming, Java, Python, Prolog, Haskell, Node.js, React Native, VHDL, SQL, ASP.NET Web API, ASP.NET MVC, C#, jQuery, Bootstrap (Framework), JavaScript, CSS, HTML5, Angular, TypeScript, HTTPClient, Software Testing, Hardware Design, Microsoft Office, Problem Solving, Communication Skills, Leadership Skills, Organization Skills, Time-management
